WHO AM I?

Hi! 🐾 I'm an italian fullstack developer currently based in Madrid. I've grown up with the mindset of a developer as an artisan who loves and cares its product the most: thanks to that I fit and give my best in multi disciplinary - agile teams, where sharing knowledge and longlife learning is key.

I'm fond of sturdy, future-evolution-proof business rules (DDD) and I usually touch (almost) every aspect of the software development, from back to front: call me fullstack.

Spare time? Partial-time student in Environmental Science, I cook well, I'm Italian coffee nazi (I have a coffee sommelier certificate, beware!) and I compete in a LGBTQ!* swimming team in my spare time.

HIGHLIGHTS

- Five years of accumulated experience in PHP and Javascript programming;
- Skilled in customized Continuous Deployment and Continous Integration;
- Deep knowledge of Symfony;
- Experienced in Test Driven Development and Domain Driven Design.
- Long lasting and tight collaboration with UI/UX experts for designing and developing interfaces.
